# METHODOLOGY

**Type of sample:** Probability sampling, multi-stage and stratified, with proportional sampling of age and gender

**Analysis Unit:** Registered voters in the Venezuelan Electoral Registry

**Location of the Unit of Analysis:** At home

**Error margin:** 2.16%

**Confidence level:** 95%

**Sample Size:** 1,600 interviews

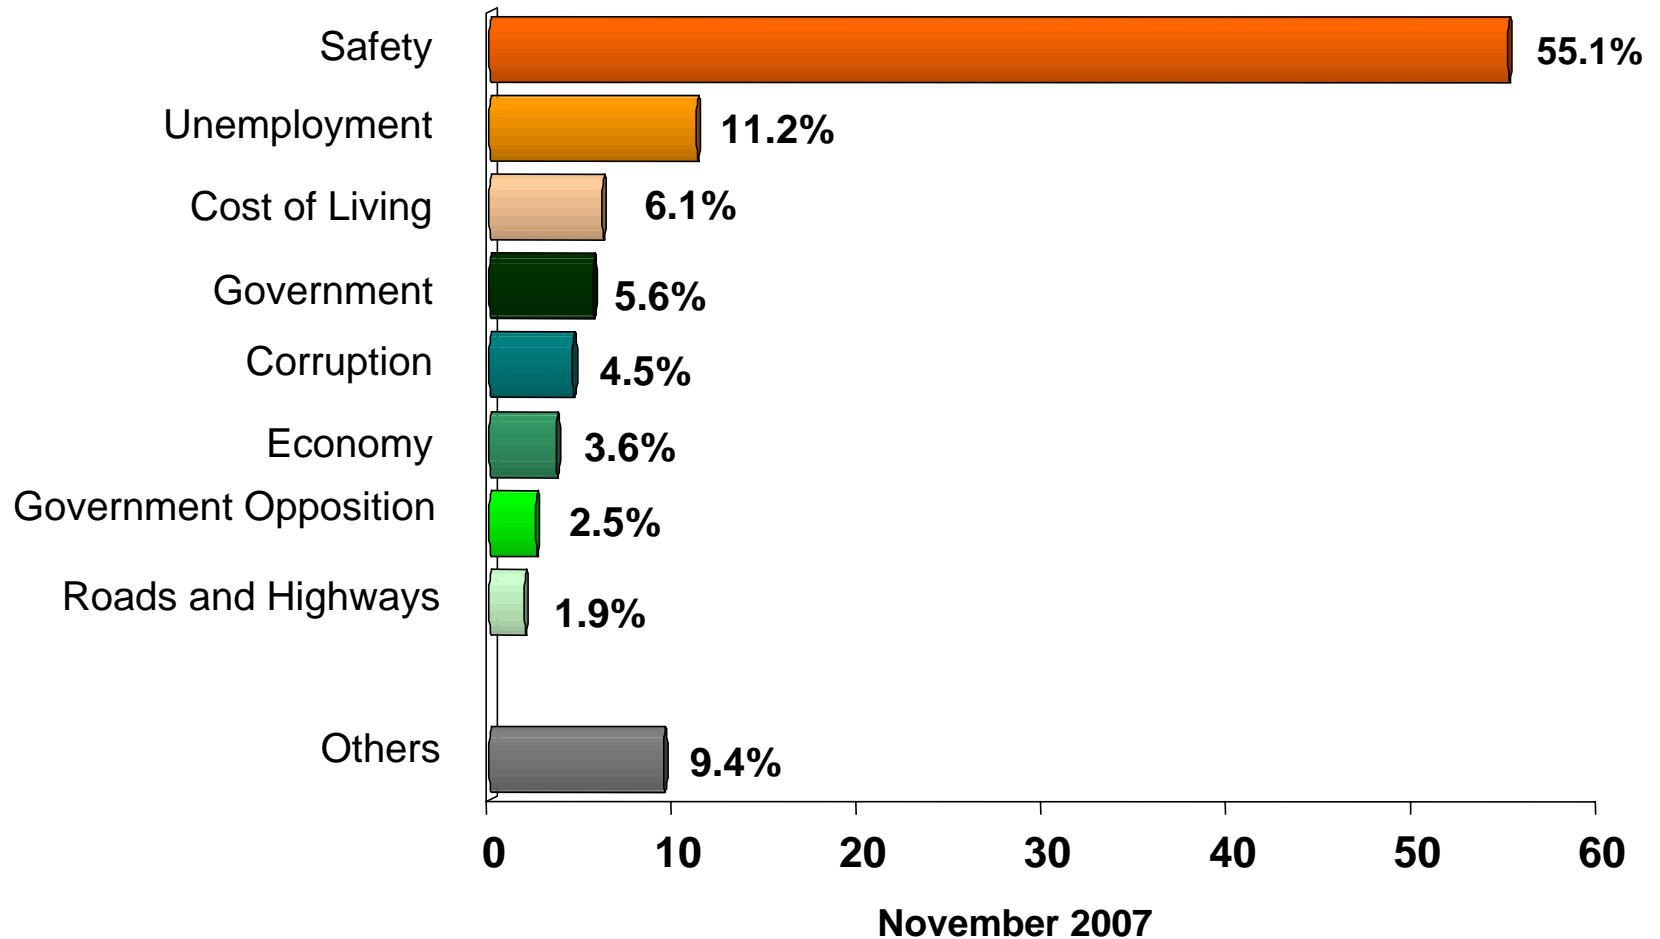

**Sample range:** 16 states

Proportional distribution to the weight of the states with a statistical management of the dispersion of the sample

**Dates of field work:** November 21 – 27

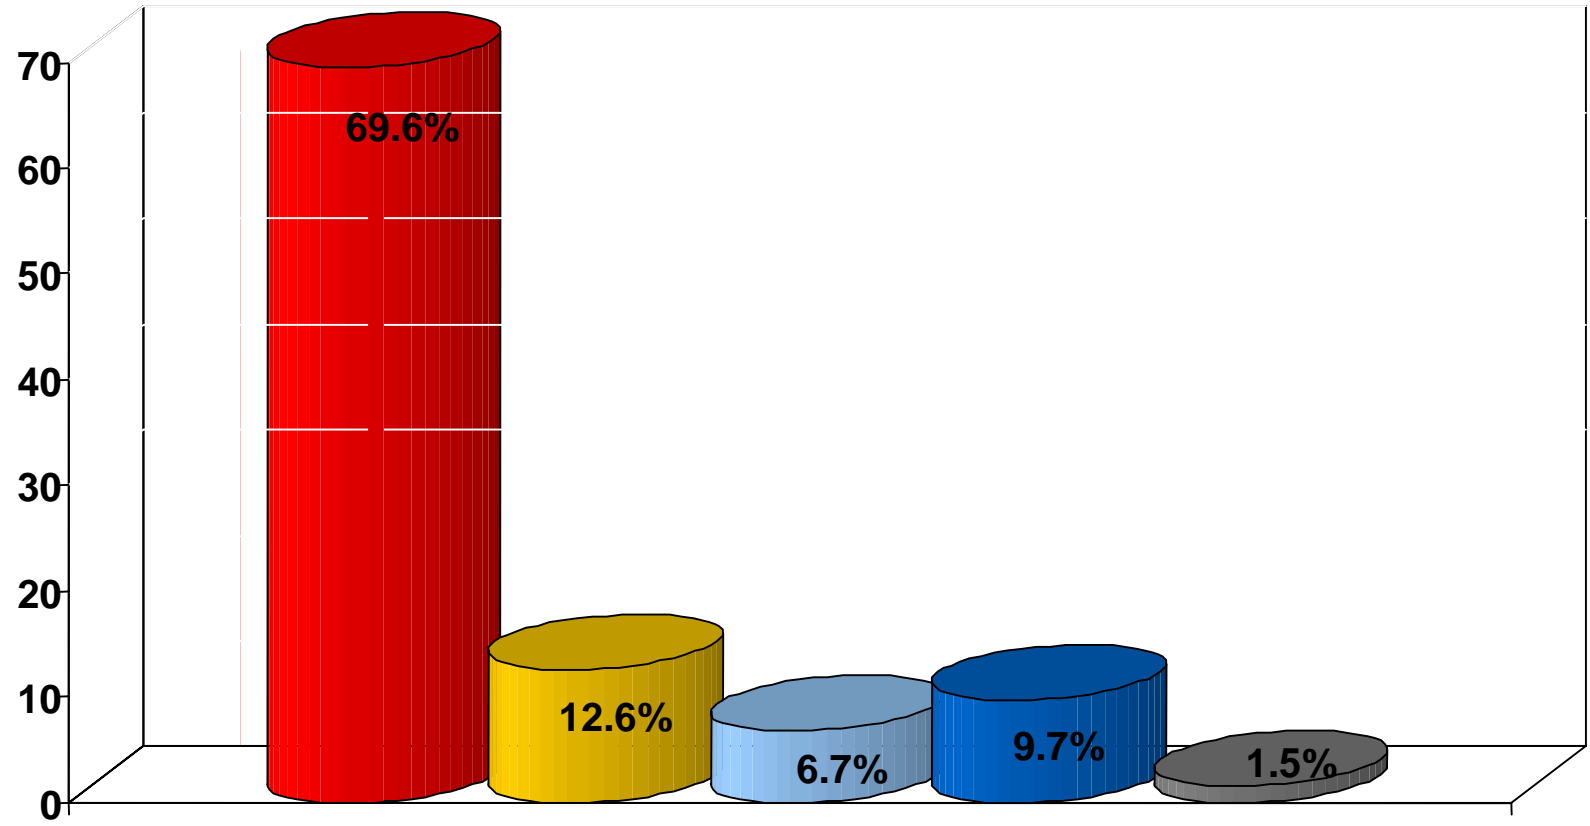

Goal: To gather the opinions of registered Venezuelan voters with regards to issues dealing with the Venezuelan electoral climate and their possible behavior in the constitutional reform referendum
